

Summary

- Senior Front-End Engineer – [Ativo](#) (Checkout) & (Gateway)
- Front-End Engineer at [Meu Nascimento](#), 10,884 users, 17,832 events, and BRL 1,250,000 in revenue in the first year.
- Software Engineer with over 5 years of experience in Web Development and technical leadership.
- Creator of **Backseasy** (+3.4K visits): [Backseasy](#)

Skills

- **Frontend:** TypeScript, JavaScript, React.js, Next.js, Vue, Tailwind CSS, Shadcn/UI, Jest, Cypress.
- **Backend:** Node.js, PHP, Laravel, NestJS, Express, AdonisJS, REST API, Prisma, TypeORM, Eloquent.
- **Databases:** MySQL, PostgreSQL.
- **DevOps & Tools:** AWS, GitHub Actions, Azure DevOps, Vercel, Git, Netlify, GitHub, GitLab, Postman, Figma, Sanity and GraphCMS.

Senior Front-End Engineer

[Ativo](#) – May/24 – Jun/25 (1 yr 2 mos)

- Payment Gateway | Transparent Checkout | Payment Solutions.
- Led the Front-End development team for the Gateway, overseeing the implementation of solutions and ensuring adherence to coding standards and best practices. Responsible for code review, technical decisions, and application structure. We used Scrum for agile methodology and Azure DevOps for project management and version control.
- Developed the **Ativo Checkout**, a modern and flexible payment system supporting integrations with platforms like Shopify and other gateways, ensuring a smoother and more efficient sales management experience.
- Built the Affiliate System using Next.js, Tailwind CSS, and Shadcn UI, automating affiliate link generation and providing sales tracking and commission metrics for the gateway.
- Developed Landing Pages with a strong focus on performance and responsiveness, including SEO metric implementation, Facebook Pixel, and RD Station integrations to improve lead conversion and expand digital presence.
- **Tech Stack:** TypeScript | React | Next.js | Shadcn/UI | Tailwind | Node.js | Express | AWS | MySQL

Front-end Engineer, Tech lead

[Meu Nascimento](#) – Aug/22 – Jul/24 (1 yr 11 mos)

- As team lead, responsible for code reviews, deployment, managing project demands, leading meetings, and providing guidance to ensure production readiness. The platform currently has 10,884 registered users and 17,832 events created.
- Participated actively from ideation to launch, leading the Front-End team, collaborating with developers to define features, and working closely with designers to deliver a user-friendly interface.
- Oversaw feature planning, component development, integration, testing, and deployments to ensure the platform functioned as expected.
- **Tech Stack:** TypeScript | React | Next.js | Node.js | Express

Fullstack Developer

FireworkWeb | Jul/22 – Jul/23 (1yr)

- Contributed to the ongoing development and maintenance of **Mastermethod**, an English school application operating in three cities in São Paulo. Worked closely with clients for testing and feedback to ensure satisfaction and alignment with project requirements.
- Used Git/GitLab for version control and efficient task management. Participated in daily meetings with the Tech Lead to track progress.
- **Tech Stack:** TypeScript | Vue.js | PHP | Laravel | Docker | MySQL | MVC

Open Source Project

[Backseasy](#) - Creator & Frontend | 2024 – Present

- I independently launched **Backseasy**, a resource library for building customizable UI backgrounds focused on elegance and simplicity. It supports developers with limited design experience and has reached over 3.4K visits from developers around the world.
- **Tech Stack:** TypeScript | Next.js | Tailwind CSS | Shadcn/UI | CSS | Markdown

Key Achievements

- Delivered the **Meu Nascimento** platform from scratch to production, reaching 10.8K+ users and 17.8K+ events, and generating BRL 1.25M in revenue. Oversaw the entire front-end lifecycle, including team leadership and product delivery.
- Created the open-source project **Backseasy**, helping developers build customizable UI backgrounds without design expertise. The tool has reached over 3.4K visits and is used to enhance UI aesthetics in modern front-end stacks.
- Contributed to open-source projects with merged pull requests at **WorkOS** and **Resend**.
